Paolo Brunasti

Software Architect & Java Senior Developer

I've an extensive experience with more than 30 years in IT, and I'm still happy to learn new technologies, methodologies and paradigms.
I constantly desire to expand my knowledge and competences, both hard and soft skills.
I'm a result oriented and pragmatic person, and I always try to be aware of the big picture. I'm diplomatic and sensible to the needs and expectations of the people around me, of their specific cultures and values.
My polyhedric expertise enable me to be the bridge between business and technologies, positioning me in a special spot as solution architect.
